

## Mission

Wireless Africa seeks to bridge Africa's digital divide by delivering highly innovative, cost-effective wireless solutions to businesses, governments, educational institutions and any other organization that could benefit from our products and services.

Wireless Africa offers the Wireless Classroom, Wireless Office, and Wireless Africa ISP solutions to:

- o Enable thousands of professionals and millions of students to gain access to the Internet;
- o Deliver distance learning and workforce development;
- o Increase access to educational materials such as online resources, text books and classroom lectures;
- o Implement a state-of-the-art wireless infrastructure.

## Wireless Africa Team

Our team of seasoned managers and implementers has over a century of business experience with a broad range of successful companies.

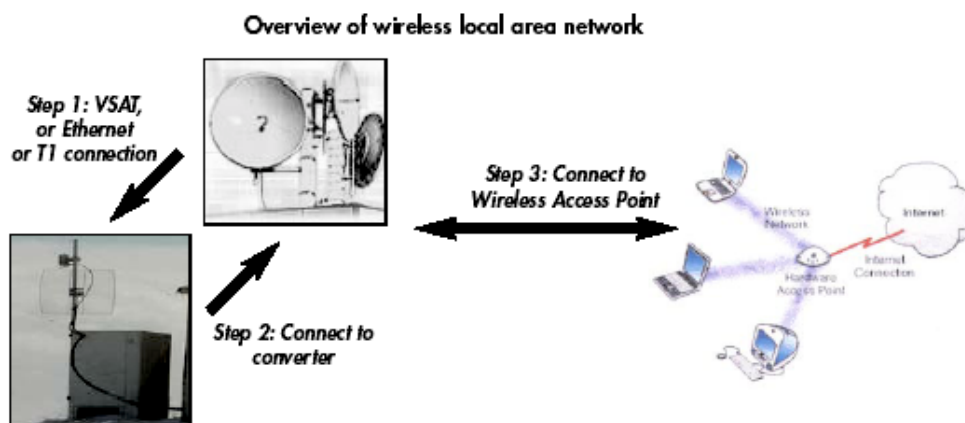

Several members of the Wireless Africa team have significant experience deploying wireless infrastructure solutions, such as the following projects:

- o American Express at ground zero in New York City, New York: built a secure, wireless network to replace the network destroyed in the September 11th attacks;
- o University of Monterrey, Monterrey Mexico: created wireless WIFI infrastructure so students could utilize public wireless access to get email, notes and turn in class assignments.

Wireless Africa serves a diverse customer base including office parks and office buildings, Internet Service Providers, Very Small Aperture Satellite (VSAT) vendors, Internet cafes, learning centers, nursing schools, universities, and Teaching schools.

## Technology Overview

Our solutions are based on advanced satellite, telephone and/or 802.11 a/b technologies. Providing a satellite uplink, these solutions can stand alone or connect through the existing telephone infrastructure.

## Overview of Wireless Classroom

Wireless Classroom is an inexpensive distance learning solution. Wireless Africa provides workforce development content and classroom materials via partnerships with leading U.S. institutions. As part of the solution, Wireless Africa sets up a completely wireless local area network (LAN) environment either in a single classroom or across an entire campus. We also provide desktop or a locked, secure cabinet with laptop computers that are connected to the Internet using wireless technology.

The solution also includes media streaming, distance learning and e-learning software.

### Features

- Workforce development and educational content
- Content encoding
- Security Services Hardware
- One wireless enabled printer
- Wireless enabled laptops with
- Highly secure, lockable rack with
- Wireless access cards and wireless access points
